

EUROPEAN SMALL-CAP FINANCING WATCH

Beta sample - capital-structure intelligence for European small caps

Research cutoff: 30 Sep 2026

Beta universe: 25 companies | Sample shown: 5

LIVE DILUTION			FUNDING PRESSURE			LEGAL CAPACITY		
Existing equity-linked instruments or recently executed transactions that can or have increased the effective share count.			Liquidity, cash generation, debt structure and refinancing requirements - assessed separately from legal share capacity.			Authorized or conditional capital that may enable future issuance. It is not treated as current dilution.		
BIO-GATE AG			MONITORING: HIGH			IDORSIA LTD		
Live / recent dilution	Funding pressure	Legal / option capacity	Live / recent dilution	Funding pressure	Debt / instruments	Live / recent dilution	Funding pressure	Legal capacity
Material	High	Material	Material convertibles	High	Complex	Low	Low-moderate	Very large
KEY TAKEAWAY After a 5:1 capital reduction, Bio-Gate issued 415,000 new shares in Aug-26, taking share capital to 2,453,738 shares. Issuer-confirmed maximum conversion potential from the three convertibles is 760,000 shares. Conditional-capital ceilings for the 2020/2022 option programs total 809,016 shares; exact live grants are not disclosed between reporting dates.			KEY TAKEAWAY At 30 Jun 2026, Idorsia reported CHF 89m liquidity and CHF 1.397bn total indebtedness, including a CHF 250m convertible loan and CHF 49m convertible bond. A further CHF 100m remained available under the secured term loan. These figures are presented separately from legal dilution capacity.			KEY TAKEAWAY Biofrontera has 6.08m issued shares and no outstanding options under the legacy 2015 plan at FY2025. Q1-26 cash was EUR 5.64m and management stated liquidity was sufficient for the following 12 months assuming plan delivery. Unused capacity includes 9.66m authorized shares plus 17.73m conditional shares - capacity, not current dilution.
